Office Action Summary	Application No. 10/815,607	Applicant(s) MATAYABAS ET AL.	
	Examiner Geraldina Visconti	Art Unit 1752	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

This office action is responsive to the reply filed 9 November 2006. Claims 9-48 have been canceled. Claims 3 and 4 have been withdrawn. Claims 49-53 have been added. Claims 1, 2, 5-8 and 49-53 are presently under consideration.

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1,2,5-8 and 49-53, in the reply filed on 8 November 2006 is acknowledged.
2. Claims 3 and 4 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 8 November 2006.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 1, 2, 5-8 and 49-53 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is rejected as being vague and indefinite when it recites a compound comprising "a melting point temperature that is less than 140°C; and a liquid crystallinity at a temperature greater than 150°C". Claim 1, as presently written, fails to particularly

Art Unit: 1752

point out and distinctly claim whether the recited temperature limitations refer to the compound itself or to the epoxy group.

5. Claims 2 and 49-53 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 is rejected as being vague and indefinite when it recites "a filler having a coefficient of thermal expansion that is comparable to that of silicon". The scope of the protection sought by "comparable to" is not clear. Also, Claim 2 fails to particularly point out and distinctly claim whether the coefficient of thermal expansion is that of silicon particles, of silica particles, of sand, of quartz, and/or of silicon dioxide.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1, 2, 5-8 and 49-53 are rejected under 35 U.S.C. 102(b) as being anticipated by either Kim (U.S Patent No. 5,182,394) or Hsu et al. (U.S Patent No. 6,338,902).

Art Unit: 1752

Each of Kim and Hsu et al. disclose a compound and a composition thereof, characterized in that said compound is inclusive of the instant formulae comprising an epoxy group and having properties inclusive of the compound of the instant formulae.
